ICEBERG Workshop

CINI – Deiser

In the frame of the ICEBERG European project (FP7-PEOPLE-2012-IAPP), the following workshop will take place to share experience and knowledge as well as discuss possible activities on the following topic concerning the software quality assurance:

Workshop: From requirements to testing. SparxSystems Enterprise Architect as a global CASE tool

Location: Federico II University of Naples, DIETI, Building 3/A, Sala Nettuno I floor

Date: November 8, 2013, 10.30 – 13.30

Held by: Antonio Almazán Faura, antonio.almazan@deiser.com

Abstract: Although agile methodologies are gaining ground, it is very important to have tools to define the process of creating software and guide users in developing those elements that add value and enable greater control over the project without neglecting the related to software quality in terms such as completeness, cohesion or integrity.

Workshop organizers:
Roberto Pietrantuono Roberto.pietrantuono@unina.it
Stefano Russo stefano.russo@unina.it
Marcello Cinque macinque@unina.it
